Mineorbit

About

I am a researcher in applied cryptography at the ENCRYPTO research group at TU Darmstadt. My research focuses on hiding program details cryptographically via Private Function Evaluation and cryptographic obfuscation. In my freetime, i play the pipe organ and develop videogames.

Education

TU Darmstadt *2022 — 2025*
M.Sc. in Computer Science
- Grade: 1.2

TU Darmstadt *2018 — 2022*
B.Sc. in Computer Science
- Grade: 1.4

Employment

Doctoral Researcher *Darmstadt, Germany*
ENCRYPTO Research Group *2025 – present*
- Designing and implementing cryptographic protocols in Secure Multiparty Computation, Private Function Evaluation, Private Set Operations, etc.
- Teaching “Cryptographic Protocols” Course and supervising student’s theses.

Student Research Assistant *Darmstadt, Germany*
ENCRYPTO Research Group *2021 – 2024*
- Implemented protocols for Private Function Evaluation, Secure Multiparty Computation, and more. Contributed to scientific writing and benchmarking.

Student Teaching Assistant *Darmstadt, Germany*
ENCRYPTO, CAC, CRYPTOPLEXITY *Summer 2021, 2024*
Winter 2021, 2022
- Assisted in teaching the courses “Formale Methoden im Software Entwurf”, “Einführung in die Kryptographie”, and “Cryptographic Protocols”.
